

University of North Carolina at Greensboro Railroad Pedestrian Underpass

Carolinas AGC Pinnacle Award for Best Building Project
ENR Southeast Award for Best Small Project
CPN Star Award

Transportation

- New Atlantic constructed a new pedestrian tunnel underneath 3 active railroad lines owned by the North Carolina Railroad and leased by Norfolk Southern Corporation. Freight and passenger (AmTrak) trains use the railroad tracks regularly (up to 40 trains per day).
- The tunnel has plazas on the North and South sides.
- The plazas slope from Lee Street (South) down to the tunnel, and then slope up to the campus (North).
- In addition to the tunnel, the project included revisions to the parking deck entrance, a new parking lot, and a new crossing for pedestrians at Lee Street.
- New Atlantic personnel had to conduct special railroad training and Homeland Security background checks for all on-site crew persons.

Location
Greensboro, NC

Delivery Method
CM at Risk

Size
Tunnel 170 LF

Architect
Wagner Murray Architects, P.A.
