

# University of North Carolina at Charlotte Parking Deck J

## Transportation

- New Atlantic constructed a 1,265 space parking deck to serve the South Village and to replace existing surface lots.
- This structure sits on a combination of drilled piers and shallow foundations.
- The framing is concrete and consists of cast-in-place concrete columns, post tension beams, and slabs-on-form deck.
- The structure includes 2 structural pre-cast stair towers, an elevator tower, and canopies. The exterior structure is decorative pre-cast clad with ornamental aluminum system features.
